

**Bijeljina University Bijeljina – Project meeting and workshop
WP2, WP4, WP5, WP8
14. 02. 2022.**

Minutes

On 14th February the Bijeljina University hosted a working meeting of the current VIRAL project. Participants were informed in advance about the most important details of the meeting through its programme. The activity was realised within the work packages WP2, WP4, WP5, WP8.

A total of 14 in person and 8 online participants took part in the meeting. After the welcoming speech of the director of the University, prof. dr. Bora Krstić, the working part of the meeting was opened by the project coordinator, prof. dr. Miljan Cvetković, who presented the results of previous activities on work packages.

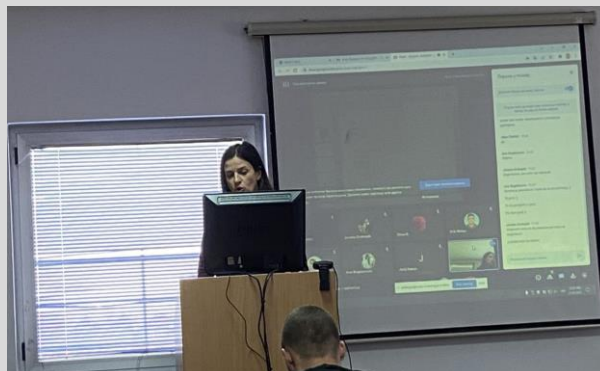

The meeting adhered to the scheduled agenda. The first topic for consideration was the current status of project equipment purchase, i.e. work package WP2.2, where it was

stated that some members of the project consortium are still waiting for it, while some have already purchased it. The beginning of the second half of the current year is stated as the approximate deadline for the equipment purchase. There is a special review of the previously held EXPO event and the student hackathon competition below. The participants discussed possible disadvantages as well as possible advantages in the future regarding their organisations.

In the continuation of the work package WP2.4, it was talked about the current status and possibilities of publishing ToT materials, as well as its use in the coming period during the planned trainings and workshops. Representatives of INTERA, i.e. Ana Bogdanović, as well as Ana Mandić from the University of Mostar, spoke more about this topic.

In the further course of the meeting, i.e. the work package WP2.7, it was discussed about the ICT course in agriculture. Its role in the regular teaching process was discussed, more precisely in adapting to the existing faculty syllabi, i.e. formal validation at certain faculties. Representatives from the University of Tuzla and the University of Mostar, prof. dr. Aljo Mujčić, then dr. Alma Šećerbegović and dr. Alisa Hadžiabulić, took an active part in this work package.

After a short break, work resumed in the WP4 work package. Participants suggested ways to organise the next EXPO event in 2022.

The WP5 was included in the proposals and conclusions of dissemination of previous knowledge to other service providers, as well as an invitation for the meeting participants to be actively involved in the upcoming seminar "Challenges in Agricultural Production in 2022", which would in a way represent the dissemination of previous activities on project work packages.

The next working day, and before the start of the training and dissemination seminar, the project coordinator, prof. dr. Miljan Cvetković, submitted a report on the project's work to date with the planned work package WP8.

In the continuation of the working day, all participants had the opportunity to participate in the training and dissemination seminar, where after the lunch break, the final discussion and closing of the meeting began.

The most significant results of the meeting were the following:

- ↳ participants were given the opportunity to get acquainted with future steps within the work packages on the project;
- ↳ the meeting enabled the participants to be convinced of the implementation of certain results in the teaching process in the form of courses in the field of ICT in agriculture;
- ↳ the participants were introduced to the proposals and conclusions for the next organisation of the EXPO event and the hackaton student competition;
- ↳ participants had the opportunity to attend a dissemination meeting in the form of an organised seminar in the field of agricultural production, where their active participation showed the implementation of their previous project activities;
- ↳ contact has been established for all those interested in further cooperation and development of new ideas and joint activities.

For all interested, who were not able to attend the seminar, the appropriate material will be available on the project website.

Bijeljina,
17. 02. 2022.
